Observation: Traditional lecture-based teaching can sometimes be passive and less engaging for students. Use technology like educational apps and tools to create a more dynamic and participative learning experience.

There are many things that are not expressed in words a huge improvement I actually expect form the entire education system..

The most important thing is the copy cases should strictly stopped.. because of such cases the real talent of the student gets to be pressed in between those..

The teaching staff should look personally towards the one who really deserve that particular part of knowledge..

More smartness & a level of complex teaching should be included..

That's it.. 🙄
